

Assembling the FootFidget® PFF1717 INSTRUCTIONS

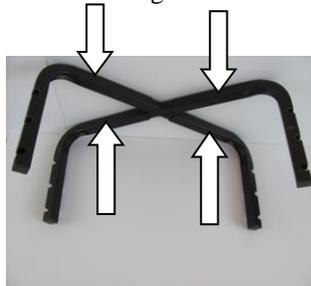

1. Remove screws from the “X” bracket. Insert each of the four “Arms” to the “X” bracket. Line up the hole on the “X” bracket with the hole on the arm.

2. Insert screw into hole, initially threading the screw by hand and then tighten with the Allen Wrench so that arms are on securely. *Do not over tighten*

3. Turn the FootFidget® upside down. Place rectangular nonskid pads on the bottom of each ‘arm’, toward the outside (closer to the bend to give the unit stability).

4. Turn stand upright.

WARRANTY: FootFidget® is warranted against manufacturer’s defects in parts and materials for 90 days from the time of purchase. In case of Warranty issues, please contact the company for a RAC (Return Authorization Code)

 888-604-0492

5. Slide both elastic cords through the large foam tube to form the FootFidget® Assembly. Cords should run parallel in the tube.

6. Attach the FootFidget® assembly to the stand. Cord loops should be placed over the top of the arms and slid down into the grooves at the same level. *Three grooves available on each arm to provide comfortable movement and varied ergonomic positions.*

PARTS LIST FOR THE FOOTFIDGET®

Nonskid pads- 4

“X” Member - 1
